Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Drawings

The drawings are objected to because in Fig. 2, spring 60 and shaft 62 are not shown as being attached to the other elements. . Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

Claims 1-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to

which it pertains, or with which it is most nearly connected, to make and/or use the invention.

On page 5, bracket 28 is said to be connected to roller 20 in a "non-rotatable" manner. This is not understood. On page 6, the securement of rod 62 to shield 34 is not understood. If shaft 62 and shaft 64 are both attached to the shield, it is not clear how the spring biases one against the other.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,4-8,13 and 14 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Verelst.

See shield 9 which has a lock mechanism 22, etc., pivot bracket 15, which is "angular", and has "mounting" apertures, one for 12 and one for pivot rod 10. The term "coupled" is met in all occurrences in that all the elements of the awning are coupled together. The support "arm" reads on any element, such as 2,8,etc.

Claims 1-3,9-11 and 15-20 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Malott.

Malott discloses support arms 24, weather shield 20,100 which is provided over a portion of the roller, pivot bracket 151, disk gear 142 which is integral, ie connected to the end cap 100 (having projection 136), and spring 152.
